

**HEDDLU
GOGLEDD CYMRU
NORTH WALES
POLICE**

Response Date:05/01/2026

2025/1306 - Fleet

In response to your recent request for information excess cost is relevant to part which removes the forces obligations under the Freedom of Information Act, as a gesture of goodwill, I have supplied information, relative to your request, retrieved or available before it was realised that the fees limit would be exceeded. I trust this is helpful, but it does not affect our legal right to rely on the fees regulations for the remainder of your request.

I am writing to request a detailed breakdown of the current vehicle fleet operated by North Wales Police.

To ensure the data is suitable for functional analysis, I request that the information be provided in a machine-readable format (Excel .xlsx).

Please structure the spreadsheet so that each individual vehicle is its own row, with the following columns provided for every entry:

1. Operational & Technical Identity

Vehicle Role: The primary functional role (e.g., Traffic Response, General Purpose Patrol, K9 Unit, Armed Response, Plain Clothes/Covert, Prisoner Transport).

Fuel Type: The specific fuel type for that individual vehicle (e.g., Diesel, Petrol, Battery Electric, Plug-in Hybrid).

Make and Model.

Year of Manufacture/Registration.

Internal Fleet ID: (A unique reference number for each asset in lieu of VRNs).

Please see attached.

Harm has been identified in providing you with any details relating to certain (unmarked) police vehicles and the make/model/VRM of all police vehicles.

A Freedom of Information Act request is not a private transaction. Both the request itself, and any information disclosed, are considered suitable for open publication. This is because, under Freedom of Information, any information disclosed is released into the wider public domain, effectively to the world and not just to one individual.

Therefore, Section 31 (1) Law Enforcement and Section 24 (1) National Security are to be considered as part of the Public Interest Test. A Public Interest Test has been carried out to weigh up the reasons for and against disclosure of the information requested, to ensure the release is in the interest of the public as a whole and not just the applicant.

Making North Wales the safest place to live, work and visit in the UK**

Harm

Disclosure of detailed fleet information such as VRNs, makes and models would be of intelligence value to individuals or groups with criminal or malicious intent. While VRNs are visible on public roads, publishing a ready-collated list of all fleet details provides a far greater level of insight than is realistically accessible to the public. This would allow offenders to:

- Clone VRNs to avoid tolls, congestion charges, or commit offences while appearing legitimate.
- Identify specialist vehicles (e.g., Armed Response or Roads Policing Units) and adapt tactics to evade or target them.
- Compromise covert operations by making unmarked vehicles easier to identify.
- Exploit post-service risks, as many police vehicles are sold at auction; knowledge of specifications and VRNs could enable impersonation of officers or misuse of residual equipment.
- Reverse engineer security systems: This means studying ex-police vehicles to learn how their security features work—such as wiring, electronics, or software—and using that knowledge to copy, bypass, or exploit those systems in active vehicles.
- Build a national mosaic picture of fleet composition and operational strength, undermining law enforcement capability.

Furthermore, where forces rely heavily on specific makes and models of connected vehicles, disclosure amplifies systemic cyber risk: a successful attack on a manufacturer could simultaneously compromise large portions of law enforcement capability, expose vehicles to remote exploitation, and leak sensitive telematics data. These outcomes would critically undermine emergency response, disrupt policing operations, and jeopardise public safety on a national scale.

Public Interest Test

S24(1) - Factors favouring disclosure: Disclosure would promote transparency and accountability in how public funds are spent on fleet procurement. It may also increase public confidence in policing by demonstrating openness and supporting informed public debate about resource allocation.

S24(1) - Factors favouring non-disclosure: Detailed fleet information could assist hostile actors in targeting law enforcement vehicles, which would undermine national security. Knowledge of makes, models, and connected systems could enable cyberattacks on manufacturers or fleets, creating vulnerabilities in emergency response and critical infrastructure. Furthermore, disclosure could facilitate reverse engineering of security systems, significantly increasing the risk of exploitation by organised crime or terrorist groups.

S31(1) - Factors favouring disclosure: Disclosure would reassure the public that police forces maintain appropriate vehicles and resources to deliver services effectively. It could also demonstrate that public funds are being used responsibly and that vehicles are fit for purpose.

S31(1) - Factors favouring non-disclosure: Releasing detailed fleet information, including VRNs, makes and models would provide criminals with a tactical advantage by revealing operational capabilities and specialist resources. It could compromise covert policing and allow offenders to take steps to evade detection or destroy evidence. Disclosure would also increase the risk of police impersonation, particularly where decommissioned vehicles are sold at auction, and could lead to the misuse of residual equipment or reverse-engineering of security systems. These risks would undermine law enforcement effectiveness and negatively impact public safety.

Balance Test:

The public interest in transparency does not outweigh the substantial risk of harm caused by disclosure.

Publishing detailed fleet specifications would allow those with criminal or hostile intent to build a mosaic picture of police capabilities, evade detection, and exploit vulnerabilities. This risk extends beyond law enforcement tactics to national security: aggregated data could assist organised crime or hostile actors in targeting specialist vehicles, exploit cyber vulnerabilities, and undermining emergency response at scale.

Such outcomes would compromise policing operations, increase risks to officers and the public, and require significant resources to counteract the harm. Therefore, disclosure is not in the public interest.

In accordance with the Freedom of Information Act 2000, this letter acts as a Refusal Notice under section 17 (1) of the legislation.

2. Financial Data

Base Vehicle Cost: The purchase price of the vehicle prior to any police-specific modifications.

Please see attached

Total Initial Outlay: The final cost of the vehicle including all refit, conversion, and livery expenses at the point of deployment.

Our information is set up and searchable for our policing purposes. We only record the cost against a job not against a vehicle so this information would not be easy to pull from our system.

To obtain the information in the format you have requested would involve manually reviewing each record on our force system. The cost of providing you with the information is above the amount to which we are legally required to respond i.e. the cost of retrieving the information exceeds the 'appropriate level' as stated in the Freedom of Information (FOI) Fees and Appropriate Limit regulations 2004.

Therefore, in accordance with the FOI Act 2000 the information you have requested is exempt under Section 12 (1), and this letter acts as a Refusal Notice under section 17 (5) of the legislation.

3. Formatting & Sorting Requirement

Please format the response so that vehicles are grouped by Vehicle Role first. Within each role, please list the vehicles in chronological order starting with the earliest year of manufacture (oldest) first, and finishing with the newest.

Clarification on Security (VRNs):

I am not seeking Vehicle Registration Numbers (VRNs). If details regarding covert vehicles are exempt under Section 31, please provide them as anonymized entries (e.g., "Covert 1") within the correct Role/Age grouping so that the financial totals remain accurate.

THIS INFORMATION HAS BEEN PROVIDED IN RESPONSE TO A REQUEST
UNDER THE FREEDOM OF INFORMATION ACT 2000, AND IS CORRECT AS AT 30/12/2025
